

How To Obtain The MAC Address File

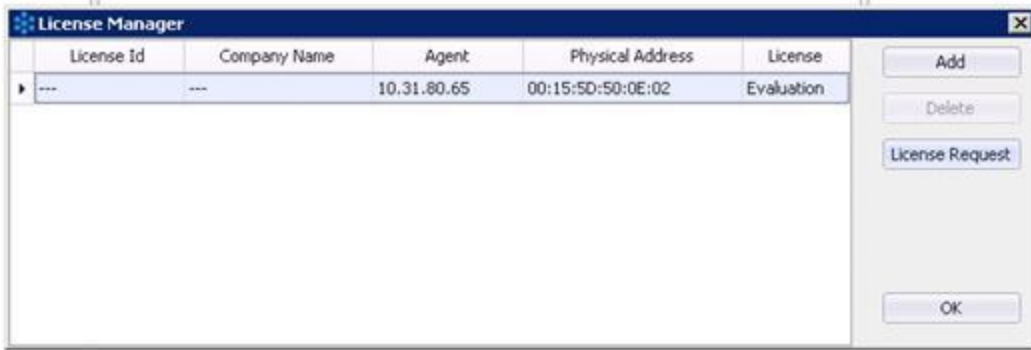

1. Open the Xian SNMP device simulator console.

2. Go to 'File > License Manager'.

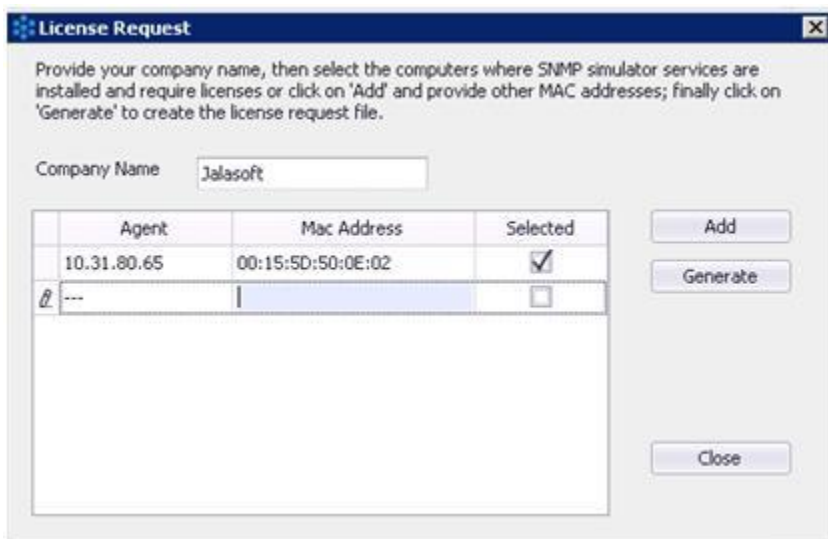

3. Click on the 'License Request' button.

4. Provide the company name.

5. Select all the computers where you installed a simulator service and require a license for from the displayed list or/and click on the 'Add' button and enter the valid MAC address of the additional computer where you have a simulator service installed or where you are planning to install it later on.

6. Click on the 'Generate' button.

7. Select the path where the license request file will be created and optionally change the name of such file and click on 'Save'.

8. Verify that a '.csv' file was successfully generated and send it to us at sales@jalasoft.com
