

Frequently Asked Questions

Xian Wings

What is Xian Wings?

Xian Wings is the best mobile solution in the market to monitor your network with Microsoft System Center Operations Manager 2007 and 2012. Our mobile solution for OpsMgr allows you to have all the functionality of Operations Manager directly on your mobile device or tablet. Xian Wings offers you the ability to receive real time alerts, graph performance data, manage state changes and execute system tasks against managed servers.

What is Xian Wings HD?

Xian Wings HD is the Xian Wings version for tablets such as iPads or Android tablets. It allows you to create your own dashboards filled with states, alerts, notifications or performance graphs widgets; you can even run power shell commands directly from your tablet.

How does pricing and licensing work?

The app is free but the service has been grouped up into two categories, which are as follows:

Smartphones \$150 USD per license.

iPads \$300 USD per license

Which operating systems are supported?

The Wings Server runs on Windows server platforms and the client app has been designed to support multiple Smartphone platforms such as iOS, Android and Windows Phone.

Do I only need to download the Xian Wings app?

No, you are also required to install the Xian Wings service, which will make it possible to connect the OpsMgr environment to your smartphone or tablet. Please make sure that the computer where the service is installed has HTTP or HTTPS connectivity to the devices and can access the OpsMgr SDK.

Can I use Xian Wings without having Xian Network Manager installed?

Yes. While Xian Wings and Xian Network Manager have complementary features, they work independently.
